DIGITAL PARLIAMENTARY
SOLUTIONS

Innovation in online and remote governance

NovaWorks®

With over 20 years' experience serving governments around the world, NovaWorks is well-placed to transform your services to a cloud-first model and deliver a modern parliamentary experience to you and your constituents.

Our secure and reliable software solutions for government will help digitise your processes and enable greater flexibility when it comes to voting, sitting and distributing content.

We understand the unique needs of government. Our work with the Parliaments of Australia, New South Wales, Victoria and South Australia have revolutionised the way their people vote, meet and share information across the country.

HOW WE WORK

The world is not static: we know your requirements will change over time in response to external and internal demands. We're here to help you navigate this changing landscape to get the most out of your technology investment.

Our client relationships are open and transparent. We'll work with you to recommend the modules that meet your needs, offer a fully customised trial and support you 24/7.

ePARLIAMENT

Our eParliament solution has been adopted by parliaments around the globe. It's our core application for parliament, and offers multiple modules that allow all staff and members to access services online, wherever they are in the world.

Fully responsive

The portal can be accessed 24/7, from desktop, tablets and mobile devices. No matter the time or place, we can run remote sittings or committees, votes and divisions.

Secure

We hand the reins over to you. We don't store any log-in information, and documents and data repositories are hosted by you.

Easy to customise

We give you the flexibility to pick and choose the modules that meet your needs, from eVoting and petitions, to Hansard and committee management. And because there's tight integration between each module, data flow is seamless and can be automated.

Here are just some of the fully-featured modules we offer:

- **e-Voting**
- **e-Submissions**
- **Sitting Calendar**
- **Committees**
- **Inquiries and Submission Management**
- **Public API Management**
- **e-Petitions**
- **Hansard (Transcription)**
- **Document Assembly and Automation**
- **Meeting/Parliament Bot for Microsoft Teams**
- **Records Compliance Management**
- **Votes and Minutes**

eVOTING and ePETITIONS

These modules are included in the eParliament product, but we're happy to provide them as standalone products.

eVoting

eVoting lets you capture key decisions from a meeting in a secure and tamper-proof way. This module is ideal for internal and external committees, boards, or other meetings that require a secure vote. The module can also be integrated with Microsoft Teams and reports can be generated as needed.

ePetitions

Our ePetitions are an efficient way for stakeholders, staff and members of the public to petition about specific issues. Our tool lets you modify submission requirements, track how many signatures have been gained, and generate reports to share.

NEXT STEPS

REGISTER YOUR INTEREST: novaworks.com.au/contact
Choose your modules. We recommend you start small to focus on your key objectives.

TRIAL
We want to ensure the best result for your workflow and procedures, so we'll configure a customised trial and show you how our tools can support your digital journey.
